It's all about going green

Green toys are so "in" this year! It's no wonder that everyone is focusing on healthy and safe green play. The "green" theme is predominant with many toy firms promoting their eco-friendly green toys. Green toys are great because they are made from recyclable and renewable materials and are environmentally friendly. Green toys are toys with a nature friendly theme. You'd be surprised at the wide variety of green toys available. Take a look at these wonderful Green Toys!

ImagiPlay

It's a different sort of fun playing with wooden toys. They're sturdy and last for a long time. However, it's important that the wooden toys your child plays with are safe. ImagiPlay is a line of wooden toys which are naturally earth-friendly, being made from renewable, plantation grown, chemically-free rubberwood. The makers of Imagiplay vouch for the fact that their wooden toys do not contain lead paint. These toys are available in natural finish as well as brightly colored safe paints.
