ALPHA TOYS UNVEILS NEW SUPER WINGS TOYS DUE TO THE SHOW'S EVER-SOARING POPULARITY

The World Aircraft Robot and Dizzy Rescue Helicopter Introduces Playsets to Super Wings Playtime in 2025!

Fontana, CA (April 18, 2025) – “Things are looking up!” Jett, Dizzy and the rest of the Super Wings crew are staying busy in the midst of their exciting 8th season, now playing on YouTube, Amazon Prime and LG TV. With bigger adventures and more challenging deliveries than ever before, Alpha Toys is keeping the fun going with all new offerings from the Super Wings toy line, including new characters for their 5-inch transforming figure line, playsets, and a combination playset and transforming figure, the World Aircraft Robot! Whether you think Golden boy is the G.O.A.T. or Dizzy is dominant, there’s a Super Wings toy out there for any fan.

Doctor Dizzy is here to help keep the Super Wings crew in tip-top shape! **The Dizzy Rescue Helicopter Playset (\$29.99)** is a Super Wings fan’s all-in-one imaginative play toy. In its folded-up form, it looks just like a giant Dizzy, complete with an expressive face, mechanical detailing, a spinning helicopter fan, and translucent pink pieces in the landing rails and headlights. Make way! Dizzy can air-lift the included bed accessory using the hook underneath. Once the flying is finished, it’s time to give our patient a checkup by opening up the playset to reveal a full doctor’s office! Inside you get a mini Dizzy figure, her little pink drone helper, plus giraffe and elephant animal patients! Dizzy can do her best to help her patients feel all better. Triage the animals by giving them an x ray, measuring their height and testing their sight. Make sure they’re comfy in the treatment area by placing them in the bed and use your medical tools to give them the care they need. Accessories include miniature medicine bottles, and doctor’s tools like a needle and stethoscope. Kiddos can use their imagination and de-mystify going to the doctor all through play with the Dizzy Rescue Helicopter Playset.

The World Aircraft Robot serves not only as the Super Wings steadfast ally, but also as their base of operations. They can be a port, a cruiser or a gigantic humanoid robot, depending on the challenge at hand. Bring the power of this gigantic, versatile ally home like never before with **World Aircraft Robot 3-in-1 Transforming Figure (\$19.99)**! World Aircraft Robot can transform between robot, space port and space craft modes, just like its on-screen counterpart. Highly accurate to their portrayal in the TV show, World Aircraft Robot has eight multicolored pods that correspond to different members of the Super Wings team. Included with this 3-in-1 transforming World Aircraft Robot are two miniature figures of Jett and Dizzy who, despite their very small size, can still transform between vehicle and robot modes! Store Jett and Dizzy inside of their corresponding pods until the time is right, then deploy them to save the

day! World Aircraft Robot can still transform into its three different modes while Jett and Dizzy are inside their pods, so nothing can stop the fast-paced adventures with Super Wings' biggest buddy by your side.

But of course, who can resist the **Super Wings Transforming Character 5-inch Figures**? New for 2025 is the highly anticipated **5-inch Golden Boy Figure (\$12.99)** which perfectly captures this character's ostentatious on-screen appearance with a shiny gold exterior and bright red accents. Golden Boy's mischievous nature belies a heart of gold, making him a fan favorite character. Golden Boy features a simple yet satisfying transformation that looks highly screen accurate in both modes thanks to the highly detailed paint applications. He also includes articulated arms and legs, allowing him to be placed in dynamic action poses or standing all by himself for display purposes! And like any of the 5-inch Super wings figures, Golden boy can transform from robot mode to airplane mode in a highly satisfying process that is easy and accessible for young fans!

To instantly add numbers to your team, check out the **5-inch Classic Character 4-pack (\$44.99)** which includes Jett, Donnie, Astra and Paul. This 4-pack will be a big hit with any long-time fan of the series, with main-stay members of the Super Wings team fully decorated to be screen accurate and highly posable like the sold-separate 5" figures. These 4-pack characters can also transform between their two modes in an easy and pleasurable process that will delight any young fans of Super Wings.

This assortment of new Super Wings toys can be found on [Barnes & Noble's website](#) and [Amazon](#). Check them out fast before they fly off the shelves! **Tune in to the Super Wings show on YouTube, Amazon Prime and LG TV!**
